Starting an Online Class – Web Developer Certificate Program

See the instructions below how to start online classes. When emailing your instructor on the first day of class to receive course entry procedures and specific requirements, PLEASE provide your full name and specify which class(es) you are registered for so the instructor can supply the correct URL.

Distance Learning requires convenient access to the Internet and an email account. You will use these to access instructional materials and resources, and communicate with the instructor. If these are new to you, please familiarize yourself before you start the class.

Please note that these courses are not using Blackboard.

For classes with **Judy Cannon**, go to www.webmastercert.com/moodle/ and register for an account for the following classes:

> ITNW 1072 Advanced World Wide Web Authoring and HTML
> ITSX 3001 AJAX
> ITSX 3015 Introduction to E-Commerce
> ITSE 1003 Introduction to Programming Languages
> ITNW 1059 Introduction to World Wide Web Authoring, HTML, and CSS
> IMED 1040 Intermediate World Wide Web Authoring, HTML, and CSS
> ITSE 1070 JAVA Programming: Part I
